CONTINUOUS TARGETED PROTECTION FROM THE THE BIG CHEESE

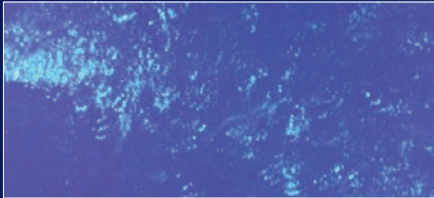

STV

LIVE PEST-FREE

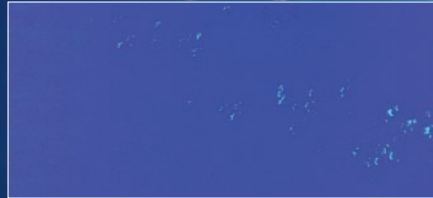

THE SOUND OF SCIENCE

The **Mega-Sonic Twin-Speaker Ultrasonic Pest Repeller** from The Big Cheese has been extensively tested against house mice and proven to deter both resident and transient mice from invading over 90% of treatment areas. The product has been widely tested by home owners with rodent problems and has received positive customer ratings.

- **Successfully repels rodent pests from over 90% of treatment areas**
- **Repels existing infestations and helps prevent build-up of new and repeat infestations**
- **Low-level and zero-activity levels were regularly measured in treatment areas whilst high levels of activity were measured in non-treatment areas**

SILENT NOT DEADLY

Loud music, roadworks, alarms and sirens can all cause discomfort to our ears and provide an unwelcoming environment which is exactly how the Mega-Sonic Pest Repellers affects rodents. Continuous ultrasonic sound at varying volumes and frequencies, inaudible to humans, prevents rodents from becoming tolerant to the effect and therefore discourages infestations and habitats.

Ultrasound does not travel through walls or other solid objects.

STV723

Mega-Sonic Plug-In Twin-Speaker Ultrasonic Pest Repeller

- Next generation attack waves guaranteed to drive out rodent pests
- 2x more powerful than single speaker rodent repellers
- Wide angle output provides whole room protection (if unobstructed)
