- Stress tested heavy-gauge wire mesh construction
- Single piece mesh cage improves overall strength
- Suitable for indoor and outdoor use

Used correctly, cage traps are a welfare-friendly way to remove nuisance animals from affected areas – both indoors and out – without doing them harm.

Most Defenders animal cage traps are supplied fully assembled and ready to use, with setting instructions and trapping tips that are easy for end-users to follow. Whether trapping birds or animals, we advise users to be mindful of their legal obligations, to comply with The Wildlife & Countryside Act 1981, and to ensure that captured animals do not suffer.

- Position traps away from hazards or areas prone to flooding.
- Practise good animal husbandry by regularly checking cage traps for catches.
- All captured animals become the responsibility of the captor.
- For live release, transport captured animals at least 3 miles from catch-site and release into a natural environment away from immediate risk of predators.

### STV088 Rat & Squirrel Cage Trap

- Ready-to-use cage trap that is easy to bait and set
- Supplied with comprehensive instructions
- Long-lasting galvanized mesh design
- Solid top and carrier handle

- Self re-setting mechanism
- Galvanised mesh with machine finish for durability without hazardous sharp edges
- Fully assembled and ready-to-use
- Protective hand plate

RRP: £29.99

Inner: 1 | Outer: 6

## Customer feedback

STV076: “**So very pleased with trap!** Already caught and disposed of main culprit. A little sensitive when setting but this is great advantage for going off as prey enters! Would highly recommend to gardeners and bird lovers. Now waiting for rest of family so can protect this year's nesting birds. Excellent – best bait so far is ginger cake.”

STV076: “I appreciate there are many types of traps but **this one is certainly one that works well.** I positioned it as if in a place that looks like a good hideout for a squirrel, covering the trap with a cardboard box with a gap and laced it with a chocolate digestive. This trap became the trap of choice over the slice-n-dice trap placed by the professional trapper... **Well done Defenders!**”

STV072: “**This cage is ideal.** It captures pests and vermin with ease and humanely. No danger of an animal or bird getting injured, and simple to release. Easy to set once you have developed the ‘know how’. It is strong and rust proof so it can be regularly washed down. Just ensure it is set up on level ground and inspected at least daily.”

STV072: “**Great product, works brilliantly!** Very easy to use – very strong. Works every time.”

STV071: “**This HUMANE trap was fantastic** – had a nightmare with a little rabbit for weeks and then bought this. The day after we set it up the rabbit was caught and we were able to transport it to somewhere suitable!”

STV071: “**The cage worked perfectly.** It does take a bit of getting used to setting the trigger. I bought it as it was the right size to trap another troublesome animal, not a rabbit. The trigger plate is so sensitive which means that as long as the animal goes in, it is certain to get caught. Great that you can let the animal out of the back opening and there is a plate below the carrying handle to protect your hand from teeth and claws. Once you have finished with it you can fold it flat for storage which saves space.”

STV088: “**This product does exactly what it says on the tin.**”
